Subject: 8801 site- prelim excavation data

Hi Tasya. I got some preliminary data from the 8801 site project manager at Ecology. See the attached zip file. Let me know that it made it to you. Here is what is included per their consultant:

1. The Area 3 Remediation Data sub-folder has
 - a. Draft figure showing the Area 3 excavation extent and depths, confirmation sample position, and results for samples left in place along with an explanation.
 - b. Draft table with the confirmation sample results.
2. The dioxin data sub-folder has
 - a. A draft figure showing current extent of the Area 4 excavation and sampling points.
 - b. The laboratory report for the 2021 samples that were analyzed for dioxin/furan.
 - c. The validation report for the 2021 samples that were analyzed for dioxin/furan.
 - d. A note with the numbering for the primary and duplicate sample name.
 - e. A figure from the 8801 July 2020 Final Feasibility Study showing remediation targeted locations and chemical concentrations.
 - f. A table from the 8801 July 2020 Final Feasibility Study that includes the previously collected dioxin/furan analysis results.
